PRANAY JAIN

Github | Linkedin | pranayjain019@gmail.com | +91 9826374575 | Indore, M.P., India

Professional Summary

Detail-oriented B.Tech. student with hands-on internship experience in **data engineering** and **AWS.** Skilled in **Python, SQL,** and **C++** with practical knowledge of **ETL pipeline development and cloud automation.** Strong analytical and problem-solving abilities with a commitment to continuous learning. Seeking to contribute to software or data-driven roles while growing professionally.

Education

Jabalpur Engineering College Oct 2022 – June 2026
Bachelor of Technology in Information Technology **CGPA: 7.32**

Work Experience

Data Engineering Intern (Manu Digital Services)
June 2025 - Aug 2025 | Indore, Madhya Pradesh, India

- Built and tested ETL pipelines using the **Medallion Architecture** (Bronze, Silver, Gold layers) for structured data transformation.
- Performed **data modeling** by designing table schemas and writing **DDL scripts** to structure datasets across bronze, silver, and gold layers in the Medallion Architecture
- Worked with **AWS services** including **S3, Glue, Lambda, Athena, and Step Functions** to automate data workflows.
- Implemented data quality and validation processes across pipeline stages using **Amazon Athena, Snowflake** and debugged issues through **CloudWatch logs.**
- Used **Git** and worked in a **Linux environment** for code versioning and script execution.

Projects

Cryptocurrency Market Analysis

Tools & Technologies: AWS S3, AWS Lambda, AWS SES, Python

- Built a **serverless workflow** to fetch and process real-time cryptocurrency price data using AWS lambda and python.
- Integrated **AWS SES** to format and send email notifications containing processed cryptocurrency price data.
- Implemented **scalable** and **cost-efficient architecture** with the option to schedule via EventBridge for daily automation.

Real Estate Market Analysis Dashboard

Tools & Technologies: SQL, Power BI

- Performed **SQL-based exploratory analysis** to study property pricing variation, price-per-sqft patterns, and agent performance metrics across multiple cities.
- Created a **Power BI dashboard** enabling comparison across city, property type, and agent performance indicators.
- View project on GitHub

Skills and Competencies

- **Programming**: Python, SQL, C++, JavaScript (Working Knowledge)
- **Data Engineering**: ETL Pipelines, Medallion Architecture, Data Modeling, Data Validation
- **Cloud & Automation**: AWS (S3, Glue, Lambda, Athena, Step Functions), n8n Workflow Automation
- **Databases & Analytics**: MySQL, PostgreSQL, Exploratory Data Analysis (EDA)
- **Visualization & Tools**: Power BI, Matplotlib, Seaborn, Git, GitHub, Linux
- **Soft Skills**: Analytical Thinking, Problem Solving, Communication, Team Collaboration
