Professional Summary

Motivated IT undergraduate with strong fundamentals in Python, C++, SQL, and DBMS. Hands-on experience as a Data Engineering intern, building SQL-based ETL pipelines and working with AWS services such as S3 and Lambda. Seeking an entry-level Data Engineer role to contribute to scalable data pipelines while continuing to grow in cloud and big data technologies.

Education

Jabalpur Engineering College **Oct 2022 – Present**
Bachelor of Technology in Information Technology **CGPA:** 7.19

Work Experience

Data Engineering Intern (Manu Digital Services)

June 2025 - Aug 2025 | Indore, Madhya Pradesh, India

- Worked on SQL-based data transformations as part of **ETL pipelines** following the **Medallion Architecture** (Bronze, Silver, Gold layers).
- Assisted in running and testing AWS Glue jobs and validating processed data using **Athena**.
- Used AWS services such as **S3 and Lambda** to support data processing workflows.
- Performed data validation and basic debugging using **CloudWatch logs**.
- Collaborated with team members using **Git** and followed structured development practices.

Project

Cryptocurrency Market Analysis

- *Tools & Technologies: AWS S3, AWS Lambda, AWS SES, Python*
- Built a **serverless workflow** to fetch and process real-time cryptocurrency price data using AWS lambda and python.
- Integrated **AWS SES** to format and send email notifications containing processed cryptocurrency price data.
- Implemented **scalable** and **cost-efficient architecture** with the option to schedule via EventBridge for daily automation.

Amazon Sales Data Analysis | GitHub

- *Tools: Python (Pandas, Matplotlib)*
- **Analyzed Amazon clothing sales data** using **Python (Pandas)** to identify sales trends, top-performing categories, and order patterns.
- Cleaned and transformed raw CSV data by handling **missing values, parsing errors, and inconsistent formats** to ensure accurate analysis.
- Performed **EDA** and **visualizations** to identify seasonal trends, top categories, and order behavior.

Skills and Competencies

Programming Languages: Python, C++, SQL
Core Subjects: Object Oriented Programming, Operating System, DBMS, DSA, Computer Networks
Visualization & BI Tools: Power BI (Basic), Matplotlib
Database: MySQL
Data & Cloud Tools: AWS (Basic experience with S3, Lambda, Glue, Athena, CloudWatch, Step Functions)
Tools & Platforms: Git, Github
Soft Skills: Communication, Team Collaboration, Problem-solving, Analytical Thinking, Adaptability
